

# VERSITY STORAGE MANAGER

THE FUTURE OF ARCHIVING

Training Offerings

All courses are instructor led by VSM experts and offered virtually. Courses may be conducted on customer site or at a third party training center by request, please contact [training@versity.com](mailto:training@versity.com) for more information or to customize or schedule training.

## Introduction to VSM

This course covers the installation and operation of the Versity Storage Manager (VSM) archiving software. Students are taught how to configure archive targets and policies that specify how various archive targets are used, as well as basic monitoring and procedures that are required to maintain the system. Sessions provide students with hands-on exposure systems and provide exercises that reinforce the material learned in class. This course is intended for students with no previous VSM or OHSM/SAM-QFS experience. Students who successfully complete this course may earn a VSM Administrative Certification.

No prerequisites are required for this course.  
Duration: 2 days.  
Virtual Training Site Price: \$1,000 per student.  
On site or third party training site; contact us for a quote.

## VSM for SAM-QFS/OHSM Administrators

This course focuses on the technical differences between VSM and SAM-QFS/OHSM. Instructors will demonstrate how to convert an existing SAM-QFS/OHSM system to VSM and discuss differences in operation and maintenance. Students who successfully complete this course may earn a VSM Administrative Certification.

Prerequisites: This course requires recent previous administration of an SAM-QFS/OHSM system.  
Duration: ½ day.  
Price: \$500.00 per student.  
On site or third party training site; contact us for a quote.

## Advanced VSM

This course covers the advanced concepts for the Versity Storage Manager (VSM) archiving software. Students are taught advanced concepts such as lun resizing, complex configurations, data migrations, etc., and learn about features that are helpful for an experienced administrator operating a large scale archival system. Lab sessions provide students with hands-on exposure to exercises that reinforce material learned in class.

Prerequisites: This course is intended for administrators who are familiar with large scale HSM systems in general or who have run VSM in the past. Students who successfully complete this course may earn a VSM Advanced Administrative Certification.  
Duration: 1-2 days depending on previous administrative experience.  
Price: \$750.00 per student.  
On site or third party training site; contact us for a quote.

## About Versity

Versity Software is the leading independent large archive software company. Redefined business practices set us apart from the legacy big company archive vendors. Discover what it's like to love your archive solution!
